

## Simple One Page Investor Breakthrough

Would you like to know the single best way an individual investor can trade in today's market?

Using Exchange Traded Funds or ETFs.

Now, you might be very familiar with Exchange Traded Funds.

However, if not I highly suggest you go here now and watch this excellent short video tutorial: <http://www.netpicksetfinvestor.com/why-i-love-exchange-traded-funds/>

The challenge though is how do you empower yourself and trade Exchange Traded Funds rather than overpriced mutual funds, or perhaps even worse, expensive investment managers.

A great service that we've used for years is located here:

<http://www.etfinvestingadvisor.com>

The only problem is it costs \$39 per month or nearly \$480 per year. It's actually worth every penny, many times over.

But, what if you could actually access this same service, all of its many features and get it for FREE and save that \$480!?

You can by going here:

<http://www.netpicksetfinvestor.com/#sign>

Enter your name and email address. Click the Red Button that says GET IT NOW.

You'll be taken to a page to finish the registration and it's ZERO COST! It likely will remain this way for a limited time so take advantage now.

On average, a low cost Exchange Traded Fund investor saves 1% (sometimes much more!) in management fees. With \$100K in your account, that saves you \$1,000 per year. Do you know what that compounds to in 10 years? Almost \$20,000!

25 Years? \$85,802.89

What if you are actually starting with more? It will likely shock you.

Next steps? Get over to the website above and sign-up to lock yourself in at the free subscription. Save yourself \$480 annually. Then watch the training videos and get started empowering yourself! See? Just one page is all it took!
